

Table of Contents

<i>A Domain Specific Language for Complex Natural and Artificial Systems Simulations</i> (Jean-Louis Giavitto)	3
<i>On the Rôle of Minimal Typing Derivations in Type-driven Program Transformation</i> (Stefan Holdermans & Jurriaan Hage)	6
<i>GamaSlicer: an Online Laboratory for Program Verification and Analysis</i> (Daniela da Cruz, Pedro Rangel Henriques, & Jorge Sousa Pinto)	21
<i>Dependence Condition Graph for Semantics-Based Abstract Program Slicing</i> (Agostino Cortesi & Raju Halder)	31
<i>Faster Ambiguity Detection by Grammar Filtering</i> (Bas Basten & Jurgen Vinju)	48
<i>Tear-Insert-Fold Grammars</i> (Adrian Johnstone & Elizabeth Scott)	63
<i>Embedding a Web-Based Workflow Management System in a Functional Language</i> (Jan Martin Jansen, Rinus Plasmeijer, Pieter Koopman, & Peter Achten)	78
<i>Specifying Generic Java Programs: two Case Studies</i> (Alain Giorgetti, Claude Marché, Elena Tushkanova, & Olga Kouchnarenko)	93
<i>Language Description for Frontend Implementation</i> (Anya Helene Bagge)	108
<i>DSL Tools: Less Maintenance?</i> (Paul Klint, Tijs van der Storm, & Jurgen Vinju)	123
<i>Using DSLs for Developing Enterprise Systems</i> (Margus Freudenthal)	138
<i>Formally Specified Type Checkers for Domain Specific Languages</i> (Arjan v.d. Meer, Alexander Serebrenik, Mark v.d. Brand, & Albert Hofkamp)	152
